My list of choice seeds and plants is sent postpaid. I have only reliable kinds and such novelties as have established value. All mixtures are made by myself from named varieties only. My packet prices are less than the usual rates, allowing a larger assortment for the same outlay. All orders for seeds are filled with the utmost promptness. I am a real, live woman and give personal attention to my business.

MY "CULTURE OF FLOWERS"

Price, 25 cents. Free with orders of 25 cents or over.

It is not enough to sow seed. It must be done right and under proper conditions. My booklet tells you how to do it. Thousands of my customers have found it an invaluable guide. This year I have carefully revised and somewhat enlarged its scope, and it will be more helpful than ever.

It is practical, not technical for the amateur, not the professional, and even the least skillful can understand and follow its simple yet comprehensive directions. To cover part of the cost, I make a nominal charge of 5 cts. **Free, if asked for, with any order of 25c. or over.**

1. I Warrant Your Remittance to Reach Me if sent by either postoffice or express money order, bank draft or registered letter, but by no other method. You may select extra flower seeds in packets to the amount of the cost of sending money by any one of these methods. If you remit by stamps or silver, it will be at your risk. If stamps are sent use one or two-cent stamps, and do not stick them to your letter. It is comparatively safe to send small amounts of silver, but it should never be put in loose in the envelope. Sew it between pieces of pasteboard or cloth.

2. I Warrant My Seeds to Reach You,

provided I receive your order, and you notify me of their non-arrival within two weeks of the time you sent your order, and give date and enclose duplicate, of which you should always retain a copy. You should receive your seeds within two or three days of the actual time it takes the mail to come and go between the two points, as I aim to fill all orders within twenty-four hours of their receipt (except plant and bulb orders). Promptness is my motto: Try me.

WHY YOU DO NOT RECEIVE YOUR SEEDS.

- a. No address given. I receive many orders without signature or postoffice being given. Be sure to sign your name.
- b. Insufficient address. If there is mail delivery do not fail to give street or rural delivery number.
- c. Indistinct writing. Take special pains to write name and postoffice distinctly.
- d. No title given. Ladies should always give title, Miss or Mrs., especially if initials only are signed.
- e. Fault in Postal Service. Sometimes packages, even when properly addressed, are lost or misrouted in the mails.

3. I Warrant My Seeds to be Good.

No one can promise that seeds will grow, nor do I, as so much depends on the conditions. I know by actual testing that my seeds are good, but if any fail to grow for you last year and you feel that the failure is due to lack of vitality in seeds, and not to some other cause, you may feel at liberty when placing your order with me this year to include such varieties. Seeds of Greenhouse Plants, which generally require special care, are excepted from this offer to replace. In making application for seeds to be replaced, please refer to date or number of last spring's order in which it was included.

A GREETING AND AN APOLOGY

Dear Patron: I take pleasure in mailing you a copy of my 1919 catalog, but call attention to the use, on account of the greatly increased cost in getting out this edition, of surplus covers that were left from a previous issue. This of course in no way detracts from the conscientious service I shall strive to give, as always in the past I have tried to render.

I regret also a necessary increase in the price of vegetable seeds, especially as there will be more need for the home garden than ever during this reconstruction period. Many lines of vegetable seeds have been grown in Europe, which supply has been cut off by the war. The expense of growing in our own country is so much more, and owing also to some partial crop failures, that for some things the grower's cost is four and even six times as much as before. While therefore compelled to advance prices, I have kept them to as low a limit as possible. Your flower garden need not cost you more, however, as there is little change in the flower list prices.

Thanking you for past patronage and hoping to serve you again this year, I am

Yours sincerely,

EMMA V. WHITE.

CINNAMON VINE BULBS

Beautiful leaves, dainty flowers, exquisite perfume, grows in shade or sun, wet or dry. No insects ever trouble. No winter harms.

A charming climber that will quickly surround your arbor, window or veranda with a wonderful profusion of vines covered with handsome, glossy, heart-shaped leaves, while its clusters of delicate white flowers emit a delicious fragrance. Very hardy, thriving almost everywhere, though perhaps not so well adapted to the extreme north. The first year the vines run about 10 feet, but eventually reach a height of 25 to 40 feet. See my "Culture of Flowers" for directions. Two or three roots, one foot apart, on each side of a door or window will quickly cover it. They do best in a warm, sunny location, though thriving almost anywhere.

Extra Quality—Sure to grow. Price, 1 strong root, 5c; 3 roots, 12c; 6 roots, 21c; 12 roots, 40c; all postpaid.

FLORICULTURE GUIDES

"CULTURE OF FLOWERS FROM SEED." My booklet of practical directions, with special instructions for Asters, Pansies, Sweet Peas, Roses and Greenhouse Seeds, free, if asked for, with an order for flower seeds of 25c or over. Otherwise the price is 5c.

"HOME FLORICULTURE." A guide to growing seeds, plants and bulbs in the house or garden. A book of 175 pages, all about the puzzling things a flower lover wants to know, gathered from the author's experience of 25 years. Price, paper-bound, 30 cents, postpaid.

FLORAL ART PICTURES

Receiving so many compliments for my dainty and artistic catalog covers, I have printed a quantity of late years without lettering. The dainty colorings and fine workmanship give them a value as art studies, and, properly framed, they will adorn any wall. I offer as follows: Double Rose Study, 1918 cover; Nasturtium Study, 1917 cover; Rose Study, 1916 cover; Clematis and Hawthorn Study, 1915 cover, and Basket of Pansies, 1913 cover. Price of any except Pansy, 5c each; 2 for 8c; 3 for 11c; more than 3 at 3c each. Price of Pansy study is 7c straight.

REMITTING BY CHECK.

When remitting by check please add five cents as, by late bank rulings, I am obliged to pay for collecting nearly all checks. Not much for you to pay for the convenience of using your check book, but in the aggregate it means many dollars for me.

"HIT OR MISS," FLOWER GARDEN

This is made up of what I have left over of last year's seeds that, upon testing, were found to germinate. A customer says, "The Hit or Miss package is not correctly named, for I am sure it never misses something worth while. It is real fun watching to see what will come, and I often get pleasant surprises." Sift out the fine seed so that it may be planted under different conditions from the coarser seed. Large packet, 4c; oz., 10c.

GRIMM ALFALFA

Absolutely pure and true to name.

Do you know that there is a decorative mine in this common forage plant? The long, graceful intensely green sprays and pretty flower heads in varying shades of blue are most valuable to one who likes to have dainty vases and baskets about; also desirable for church decoration.

Why use Grimm when the price is higher than for other varieties? Because (1) It is the hardiest variety known and is the only safe kind to sow in Northern latitudes. (2) It requires less seed per acre on account of its large stooling habit. (3) It yields a much larger percentage of persistent plants, and (4) it holds its stand and does not thin out after the first severe winter. The great productiveness of Alfalfa is well known, always yielding three cuttings and often four in a season. Use 10 to 12 pounds per acre. Trial pkt., 4c; oz., 10c; $\frac{1}{4}$ lb., 20c; 1 lb., 75c, all postpaid; not prepaid, 1 lb., 65c; 10 lbs., \$6.00, to be sent by express or mail, as directed. If by mail, include postage on eleven pounds weight. 30 pounds and over, 50c per lb.

Bulletin No. 209. Send a dime to the Supt. of Documents, Washington, D. C., for Bulletin No. 209, which tells all about Grimm Alfalfa.

Dedham, Mass.—"We have bought Aster seed of you for over 10 years. Had about 800 plants this year and cut blooms till after frosts came. They were greatly admired, even by the florists. Cosmos too was especially pretty. We do have good luck with your seeds."—Mrs. C. F. Ingalls.

ACACIA LOPANTHA

Half-hardy trees or shrubs with finely laciniated foliage and long racemes of small yellow flowers. In the North they can be used as conservatory plants only, but are perfectly hardy for the Southern states. Before planting soak seeds in hot water until they swell. The hard, shiny black seeds, either alone or combined with beads, make lovely necklaces. For this purpose they must be soaked in hot water (near boiling) until they swell. String them while soft. If all do not swell at once, keep the rest soaking in the hot water. After drying, they go back to their natural size and color. One-half ounce makes a nice necklace. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 75c.

Enchantress—Branching Type

ENCHANTRESS ASTER

A splendid Aster introduced by Vick, highly recommended for commercial growing. The plants are upright in habit, bearing immensely large flowers on long strong stems. The color is soft pink, like that of the popular Pink Enchantress Carnation. The blooming period is an advantage too, as they come between the mid-season and late blooming sorts. Pkt., 75 seeds, 8c.

PEERLESS PINK ASTER

Introduced by Dreer, and said by experts to be the best shell-pink of its type. It is a cross between the pink Crego and late-branching shell-pink, but is more closely related to the latter class in form, color and season of flowering. They bear immense flowers, 4 and 5 inches across, of a beautiful rose, or shell-pink in color. Pkt., 75 seeds, 8c.

SENSATION

A New Red Aster

This is a long bloomer of the late-branching type, and my grower thinks it the best red bedding Aster he has ever seen and says it is the nearest to a true scarlet. The buds are rosy carmine, changing to a beautiful dark velvety scarlet in the fully open flower. Pkt., 75 seeds, 8c.

Mrs. C. J. Barnhart, Ohio—"I have grown your seeds for several years and they have always proven satisfactory. Asters last year were gorgeous."

BEST TWENTY-FIVE GRANDIFLORA SWEET PEAS

SWEET PEA MIXTURES

BEST GRANDIFLORA VARIETIES, MIXED

This is my choicest mixture of Sweet Peas and cannot be surpassed in variety or richness of color or size and substance of bloom. I make it myself and include in it not only the 25 varieties described on page 14—a proved list of standard sorts, the very best in cultivation today—but a number of other named varieties and also a large percentage of the popular new wavy Spencer and Unwin types, thus making it thoroughly up to date. Mrs. Coryell, of Adrian, Mich., says: "From one pkt. of your Grandiflora Sweet Peas I had a nine-foot row, and though grown on very ordinary soil, I gathered on July 29 a bouquet of 185 stems, with 21 varieties. EARLY-FLOWERING, CHRISTMAS SWEET PEA

The earliest-flowering sorts, blooming in about twelve weeks from sowing, called "Christmas" Sweet Peas because used by florists for forcing in their greenhouses, furnishing bloom for Thanksgiving and Christmas from seed sown about Sept. 1. But they are more used for early spring planting and every one should have at least a short row and thus get flowers from three to four weeks earlier than from the standard sorts. All who grow to sell should grow them, as early blooms bring best prices. The plants begin to bloom when about a foot high and never attain a height of more than 3 or 4 feet and are often grown without support.

Having made arrangements with one of the largest Peony and Iris nurseries in the United States to furnish the bulbs and plants listed on pages 42-46, inclusive, I am prepared to give you splendid expert service, better than if I grew the stock myself. They grow over 200 varieties of Peonies, and nearly as many sorts of Iris, and if you should desire others not in my list I will make quotations. Orders from these pages will be sent separate from seeds or other plants.

Time Limit. Peonies and Phlox cannot be sent later than about May 1; Iris, May 15; Miscellaneous Perennials, May 15; Cannas, Dahlias and Gladioli, June 1. Late orders for these should be in my hands at least a week before the dates given. I am also prepared to make fall delivery of Peonies, Phlox, Iris and the miscellaneous Perennials mentioned on page 46.

Deliveries. Unless otherwise requested, orders received before April 1st will be placed on file to be sent as soon thereafter as possible. They come in all conceivable colors, shapes and sizes. The possibility of producing a variety superior to all others—and more valuable than a gold mine—is extremely fascinating.

HIT OR MISS PERENNIAL COLLECTION

Ten Plants for 50c, Postpaid.

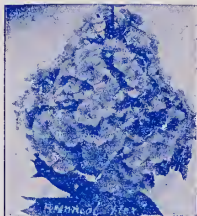

Delivery after June 15, but place order now. A collection of nice, thrifty plants, all of first quality, to be selected (my choice) from the surplus stock of the list on p. 48, at least four different kinds. Plants will be much larger then and such as would sell next spring at 15c each. Order now and save \$1.00.

Acacia Lopantha

The hard, shiny black seeds, either alone or combined with 14 beads, make lovely necklaces. For this purpose they must be soaked in hot water (near boiling) until they swell. They should be strung as they swell and become soft. If all do not swell at once, keep the rest soaking in the hot water. After drying, the seeds go back to their natural size and color. One-half ounce makes a nice necklace. Pkt. 5c; 1/2 oz., 10c; oz., 15c; 3/4 lb., 50c.
